

Airport Passenger Screening Systems Market is estimated to be US\$ 4.90 billion by 2030 with a CAGR of 10.5% during the forecast period

Airport Passenger Screening Systems Market is estimated to be US\$ 4.90 billion by 2030 with a CAGR of 10.5% during the forecast period. A passenger screening system at an airport is a system that scans people before they board a plane. The screening devices are intended to protect civil aviation against unintentional harm, terrorism, and other dangers. It examines individuals, their possessions, and cargo to ensure that forbidden goods such as metal objects, weapons, and booze do not enter. Increased security dangers aboard civil aircraft, such as hijacking, robbery, and bombing, drive demand for full-body scanners and enhanced passenger screening technology.

The report "Global Airport Passenger Screening Systems Market, By Type (Metal Detectors, Full Body Scanners, and Advanced Imaging Technology) and by Region (North America, Europe, Asian Pacific, Latin America, and Middle East & Africa) – Trends, Analysis, and Forecast till 2030"

Key Highlights:

- In 2021, Delta Air Lines, in collaboration with TSA PreCheck, the accelerated airport screening programme in the United States, has introduced a hands-free bag-drop service powered by computer vision for qualified frequent flyers.

Analyst View:

Because of the advancement of computer screening in airports, the global market for airport passenger screening systems is expected to have a strong foothold in its expansion. As airports want strong screening facilities to alleviate growing worries about passenger screening processes, private security services have gained a lot more clout in the market. Increased flight traffic, decreased prices, a time stress, and greater disposable income are expected to drive demand for airport passenger screening technologies.

Key Market Insights from the report:

The global airport passenger screening systems market is segmented based on type and region.

- Based on Type, Global Airport Passenger Screening Systems Market is segmented into Metal Detectors, Full Body Scanners, and Advanced Imaging Technology.
- By Region, the Global Airport Passenger Screening Systems Market is segmented into North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

Competitive Landscape & their strategies of Global Airport Passenger Screening Systems Market:

The key players operating the global airport passenger screening systems market involves OSI Systems Inc., OSI Systems Inc., Analogic Corporation, C.E.I.A. SpA, Agilent Technologies, Garrett Electronics Inc., Nuctech Systems Ltd, Kromek, Technologies Inc., Vanderlande Industries BV, and Leidos. Key player operating in the target market are focusing in the development of advanced technologies in order to get a competitive edge in the target market. Also, some among the key players are focusing on the strategic partnership to contribute in the target market.

The market provides detailed information regarding the industrial base, productivity, strengths, manufacturers, and recent trends which will help companies enlarge the businesses and promote financial growth. Furthermore, the report exhibits dynamic factors including segments, sub-segments, regional marketplaces, competition, dominant key players, and market forecasts. In addition, the market includes recent collaborations, mergers, acquisitions, and partnerships along with regulatory frameworks across different regions impacting the market trajectory. Recent technological advances and innovations influencing the global market are included in the report.
